BINALI ASSALAARACHCHI

AI & SOFTWARE ENGINEERING UNDERGRADUATE

076-6504001 binaliassalaarachchi@gmail.com Pannipitiya, Sri Lanka

PROFESSIONAL SUMMARY

AI & Software Engineering Undergraduate at SLIIT with hands-on experience in full-stack development, machine learning applications, and project coordination. Skilled in building end-to-end software solutions using technologies such as React.js, Python, and Node.js while working within Agile/Scrum environments. Proven leadership experience through AIESEC roles, managing teams, coordinating events, engaging stakeholders, and supporting strategic initiatives. Strong analytical, organizational, and communication skills, with a passion for leveraging technology and collaboration to deliver impactful results.

PROFILES

LinkedIn GitHub Portfolio

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, C, Node.js
AI / ML	Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, neural networks, data preprocessing, model evaluation
Web Dev	React.js, React Native, Node.js, Express.js, Spring Boot, HTML, CSS, REST API Integration
Databases	MySQL, MongoDB — relational design, SQL queries
Tools	Git, GitHub, Maven, Cisco Packet Tracer, Arduino, Canva
Practices	OOP, MVC Architecture, Agile/Scrum, Full-stack development

SOFT SKILLS

Teamwork | Leadership & Responsibility | Time Management | Problem Solving | Analytical Thinking | Presentation Skills

KEY PROJECTS

CineMatch - AI-powered movie recommender **GitHub Repo**

- Tech: Python, Django, Scikit-learn, Pandas, React.js, TMDB API, MySQL
- Built a full-stack content-based movie recommendation web app using cosine similarity ML model; integrated TMDB API for real movie posters and ratings, and JustWatch for streaming availability. Django REST API backend connected to a React.js frontend with real-time search and smart recommendations.

Student Performance Prediction & Study Schedule Generator **GitHub Repo**

- Tech: Python (Django), Scikit-learn, Flutter, MySQL, API Integration
- Individual BCS project: built an ML model that predicts student outcomes and auto-generates personalized study plans. Achieved pass grade. Demonstrates end-to-end AI pipeline from data preprocessing to UI.

Driver Dashboard - Travel Itinerary Planning & Vehicle Booking System **GitHub Repo**

- Tech: React.js, Node.js, MySQL, Python (AI component), API Integration
- Full-stack system with an AI-powered itinerary recommendation engine; handled front-end, Node.js API integration, database schema design, and deployment. (Year 2 Semester 2)

Driver Dashboard - Travel Planning App **GitHub Repo**

- Tech: React Native, Node.js, MongoDB, Frontend/Backend Deployment
- Mobile travel planning application built with React Native and MongoDB; handled full-stack development and deployment. (Year 2 Semester 2)

Driver Dashboard - Travel Planning App **GitHub Repo**

- Tech: React Native, Node.js, MongoDB, Frontend/Backend Deployment
- Mobile travel planning application built with React Native and MongoDB; handled full-stack development and deployment. (Year 2 Semester 2)

Heart Disease Prediction - ML Model **GitHub Repo**

- Tech: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Developed and evaluated multiple classification models for heart disease risk prediction; performed data cleaning, feature selection, and performance comparison using accuracy, precision, and recall metrics. (Year 2 Semester 1)

Laundry Management System - Payment Module & Database **GitHub Repo**

- Tech: Java, Spring Boot, Maven, MySQL, HTML/CSS/JavaScript
- Designed and implemented the payment and database module for a group project; applied MVC architecture and relational database design best practices. (Year 2 Semester 1)

IoT Water Level Management System **GitHub Repo**

- Tech: Arduino, Sensors, IoT Concepts

Order Management Component - Inventory Management System

- Tech: Java, Object-Oriented Programming Principles
- Built the order management component of a group inventory system; applied core OOP principles including encapsulation, inheritance, and polymorphism. (Year 1 Semester 2)

Network Setup using Cisco

- Tech: Cisco Packet Tracer, Networking Fundamentals
- Designed a multi-device network topology; applied subnetting, routing, and switching concepts.

EDUCATION

BSc (Hons) Information Technology specializing in Artificial Intelligence CGPA: 3.52 | Currently in Year 3
Sri Lanka Institute of Information Technology (SLIIT)

BCS Level 6 Professional Graduate Diploma in IT 2025 - Present
Modules: Advanced Database Management, Programming Paradigms, MIS, System Design

BCS Level 5 Diploma in IT 2023 - 2024
Modules: Database Systems, OOP, System Analysis & Design | Result: Pass

BCS Level 4 Certificate in IT 2023
Modules: Networking, Software Development, Information Systems | Result: Pass

Certificate in Computer Science 2021 - 2022
National Institute of Business Management (NIBM)

GCE Advanced Level - Commerce Stream 2021 - 2023
Accounting (A), Economics (A), ICT (A), General English (A) St. Paul's Girls' School

LEADERSHIP & PROFESSIONAL EXPERIENCE

Member (Volunteer) - Leo Club of SLIIT 2025 - Present
Organizing Committee Vice President (Marketing) - Kokila Rawaya'25 organized by AIESEC in SLIIT
MXP Marketing Team Leader - AIESEC in SLIIT Jul 2025 – Jan 2026
Campaign Coordinator - Outgoing Global Teacher (OGTe) - AIESEC in SLIIT Jul 2025 – Jan 2026
Founder & Designer - Graphic Gurus Website

CERTIFICATIONS & ACHIEVEMENTS

- **AI Skills Fest 2026 — Microsoft | Jun 2026**
  Credential URL: Credly
- **SLIIT Faculty of Computing Dean's List - Year 1 Semester 2**
- **Emerging Marketer - Legacy 2025 (AIESEC in SLIIT), Nominee**
- **British Council Key English Test (KET) - Pass with Merit (2016)**
- **English & Communication Certifications (CALSDA): Speech, Drama & Communication Skills**
